

1. Multi Language Support

2. Create Bilingual Question Papers

3. Classification For Question Entry

- Content Hierarchy: Board, Class, Subject, Chapter, Topic
- Reference (Book, Author Name, Page No etc.)
- Marks
- Time Duration for each Question
- Difficulty Level (L1,L2,L3)
- User/Author
- Approve Questions for test (after proof reading)
- Hint
- Explanation/Solutions
- Images and Equations support

4. Question Entry Formatting

- Question & Options – Font, Font Type, Font Size [B],[i],[U]
- Alignment – (Left Align, Right Align, Center Align, Justify)
- Line Spacing
- Bulleting
- Indent & Hanging for Question/Option/Answer/Explanation Text
- Text Color, Back color
- Customized table creation
- Subscript, Superscript Support

- Inserting image
- Copy/Paste data from other applications like Word, Paint, Equation editor
- Supports mathematic, Physics and Chemistry symbols
- Table support
- Equation Editor
- Search Content Tag

5.

## Question Types

- MCQ Single Correct
- MCQ Multiple Correct
- True/False
- Fill In the Blanks
- Short, Medium and Long Descriptive
- Comprehension, Paragraph, Passage, Data Interpretation type questions
- Match The Pairs
- User Defined Question Type: Users can add their own question types

6.

## Question Import

- Manual Upload
- Bulk Questions Import using Word Document
- Bulk Questions Import using Excel Document

7.

## Test Types

- Multi-board, multi-class, multi-subject test.
- Objective & Subjective Type
- Objective Type
- Chapter Wise
- Subject Wise
- Question Type Wise
- Chapter Wise Question Type Wise
- Topic Wise
- Marks Wise
- Difficulty Level Wise
- Select Your Questions (Select each Question manually and create a customized test)

8.

## Test Settings

- Set test using total marks or total Questions
- Auto Calculate Time Duration based on Question duration set
- Select Difficulty Level of questions to be included in the test
- Exclude Questions from previous tests – so that questions are not repeated in tests.
- Set customized sections for group of questions

9.

## Test Preview

- Test and its contents can be previewed immediately after it is generated
- Edit Test to manually delete/enter specific questions in existing tests

10.

## Test Template

- Create test template for test generation – specify all selection criteria.
- Create board exam patterns or any exam patterns and create multiple tests using same criteria. No need to set the criteria again and again.

11.

## Test Print Settings

- Font, Font Type, Font Size [B],[i],[U] along with sample text
- Alignment – Left Align, Center Align, Right Align
- Include customized Header / Footer
- Include customized watermark for branding, copyright and security
- Set Page Borders and Margins
- Set blank lines for subjective type of questions for students to answer on paper itself
- Include Test Instructions to be displayed at the beginning of test.
- Display Question reference
- Set Two Columns per page for saving paper
- Display Settings for Answer Options
  - ✓ Customized answer options per line, single, two or all
  - ✓ Fixed width answer options for better looking printing
  - ✓ Numeric or Alphabetic answer options settings (A) (B) or (1) (2)
- Other Print Options for grouping questions on test
  - ✓ Group questions chapter – wise
  - ✓ Group questions Subject – wise
  - ✓ Reset questions numbering for each subject
- Bilingual Questions Side-By-Side or One-Below-Another

- Display question type
  - ✓ Reset questions numbering for each Question Type
- Display marks per question
- Display Chapter number
- Sort Questions Mark wise
- Sub question type answer option settings
- Section Settings
  - ✓ Group section – wise set at the time of test generation
  - ✓ Display sections
  - ✓ Reset the question numbering for each Section
  - ✓ Section Number Type Setting – Numeric, Alphabetic, Roman 1,2, 3/A,B,C/I,II,III

12.

## Test Mark Setting

- Set and display default marks for each type of question

13.

## Manage Multiple Sets of Question Paper

- Shuffle/Randomize questions for each set
- Randomize answer options for each set
- Generate answer key document, this will have correct answer options
- Generate answer document with explanations/solutions and question Id along with question text. Use this as master answer sheet for evaluation.

14.

## Question Statistics Report

- Report generation based on desired criteria
- Tabular and graphic representation of question type wise distribution
- Difficulty Level Wise Question Distribution
- Approved/Unapproved Question Distribution
- Operator Wise Question Distribution used when institute want to know the number of questions entered by a particular operator on a certain day or in a specific subject.
- Download above statistics into excel spreadsheet as well pdf format.

15.

## Test Analysis Report

- Test Type – wise graphic representation
- Difficulty Level Wise Question Distribution
- Mark Wise Question Count
- Chapter Wise Question Count
- Question type wise Distribution

16.

## Question bank proof Read and Consistency Check

- Export for proof reading, easy option to make corrections
- Data consistency checks
  - ✓ Missing Images in question bank
  - ✓ Duplicate Answer Options
  - ✓ Duplicate Question Text
  - ✓ Downloadable generated reports

17.

## Question Search

- Search questions according to different advanced search criteria
  - ✓ By Board/Class/Subject/Chapter/Topic
  - ✓ By question text
  - ✓ By Question Id
  - ✓ By Marks
  - ✓ By User / Author
  - ✓ By difficulty Level
  - ✓ By Creation date
  - ✓ By Language
  - ✓ By Question Type
  - ✓ By Paragraph for Comprehension type of questions
- Add / Edit Question and question details
- Export Word file in multiple formats:
  - ✓ Proofread format
  - ✓ Tabular format
- Question exported in tabular format can be imported again into the database

18.

## Admin & User Management and security access rights

- Multiple user creation along with admin
- User Specific Permission module
- Subject specific Permissions for users

## 19. Database

- Multiple database Creation & Configuration
- Dynamically connect to any database

## 20. Backup and Restore

- Take timely backups – never lose your data.
- Restore from previous backups.
